DYNAMIC E-COMMERCE CONNECT

Bortell's Dynamic e-Commerce Connect module is a tool specially designed to provide an interface between e-Commerce web software and Microsoft Dynamics GP financial suite.

Dynamic e-Commerce Connect assists your business in avoiding the problem of entering data from one system into another. Dynamic e-Commerce Connect automatically updats Microsoft Dynamics GP with information captured through your e-Commerce web site.

Reporting and tracking becomes faster and more reliable allowing you the time to spend time on planning and business growth instead of on time consuming tasks of tying stand-alone systems together.

Dynamic e-Commerce Connct is specifically designed to integrate seamlessly with Microsoft Dynamics GP.
